

EXTERNAL PREDICTIONS FOR MAY 4, 2026 FOR CLAUDE REVIEW

Compiled packet of external/public MLB predictions and prop angles. This is not a fresh EchoIQ betting card, not an odds-edge recommendation sheet, and not a postgame grade. It is designed for Claude to compare external prediction inputs game-by-game against final outcomes.

Scope and usage notes

Use this as a pregame external-prediction ledger. Each game includes the numberFire/FanDuel win-probability read, the Winners & Whiners side/total/score projection where captured, and public prop targets from Covers, Dimers, DraftKings Network, Bleacher Nation/DataSkrive, ATS.io, BetMGM, and related pages. Odds were source snapshots and may have moved by first pitch.

Important: The report intentionally separates external predictions from EchoIQ verification. A player appearing below is a public-source prediction/prop angle, not automatically an EchoIQ-qualified wager.
